

Creating Safe, Stable, Nurturing Relationships and Environments for All Children

FREE COMMUNITY TRAININGS

We are proud to offer a variety of FREE trainings for parents and providers.

For Parents All sessions are 1 hour.

CHOOSE YOUR PARTNER AND CAREGIVER CAREFULLY

The purpose of this course is to provide information on how to carefully select safe caregivers for children, including identifying warning signs and behaviors in potential significant others, babysitters, or other individuals that may care for children.

ENOUGH ABUSE:

STRATEGIES FOR YOUR FAMILY & COMMUNITY

Enough Abuse! This educational program provides strategies for adults to take responsibility for preventing child sexual abuse. Learn how to recognize behaviors in adults that suggest someone might pose a sexual risk to children, and to recognize signs a child might have been sexually abused.

HEALTHY FAMILIES, HEALTHY COMMUNITIES:

This class, appropriate for all types of community organizations, focuses on tactics for building strong family foundations and community connections, enabling communities to prevent neglect and abuse through forming interconnected support systems.

For Providers CEUs are available upon request. Sessions available for 1 or 2 hours.

RECOGNIZE & REPORT CHILD MALTREATMENT:

Child maltreatment is not selective; it exists in all segments of our society. This training will teach individuals how to recognize characteristics of child maltreatment in children and abusive parents, defining a mandated reporter, identifying steps in reporting suspected child maltreatment, and resources for families and caregivers.

ENOUGH ABUSE:

PREVENTING CHILD SEXUAL ABUSE

Enough Abuse! This educational program discusses the nature and scope of child abuse, from inappropriate boundary violations to illegal sexual abuse of child or teens. It also provides elements of proper screening of prospective staff and how to respond to disclosure of sexual abuse or misconduct.

For Parents and Providers

TOXIC STRESS & CHILD DEVELOPMENT:

A child's earliest years are the most crucial for brain development. Living in stressful environments can negatively affect a child's emotional, social, and physical development. Through this training, attendees will be provided with an overview of how stress can affect brain development, and be shown how to identify potentially unsafe children and the steps to take when suspicion arises.
