

SUMMARY OF 2024-2025 WEIGHTED SURVEY RESULTS BY COUNTY

The table below outlines the percentages of responses for the 2024-2025 school year survey results by Clark County, Washoe County, and the Rural Counties. Not all respondents answered every question on the surveys that were returned. All percentages calculated are based on the total weighted number of people answering the question, rather than the total number of people who completed a survey. In addition, percentages are represented by county(ies); therefore, percentages will total 100 percent within each county category and not across all county categories.
